

Marko Ilic

marko97.ilic97@gmail.com | linkedin.com/in/markoilicdev

Skills

Technologies: AWS, Terraform, PostgreSQL, NoSQL, Terragrunt, Git, Docker, GitHub Actions, Jenkins, Node.js

Languages: Python, TypeScript, SQL, HTML, CSS, Bash, PHP, Lua

Agentic (Claude Code) workflow: Planning, Prototyping, Domain-driven design, Red/Green TDD

Experience

Senior Cloud Engineer, Auvaria

May 2025 – Present

- Designed and developed an automated invoicing pipeline for AWS cloud reselling, saving CEO 22+ hours/month
- Constructed scalable and cost-effective AWS infrastructure for clients, reducing bill for each client on average by 15%
- Built and presented data analysis and AI PoCs for clients with a 1/5 go-to-production conversion rate
- Cut deploys from days to <1h for 12 teams via standard CI/CD, IaC modules and observability; MTTR down 60%
- Ended peak outages by moving on-prem monolith to multi-AZ AWS ECS (Terraform): 99.95% uptime, -30% cost

Lead Engineer, Great Agency Inc.

November 2022 – May 2025

- Led a team of 4 to design, develop, test, deploy and maintain feature-rich insurance platform
- Reduced deployment time by 60% by caching dependencies in an in-house Docker image
- Eliminated data losses with “save as you type” forms
- Built a customer ACH intake form meeting PII standards via encryption, access controls, and data minimization.
- Moved all company documents to AWS S3 by building a custom document upload module
- Developed user friendly form validation, allowing new users to learn the software more quickly
- Provided quick access to all data in a database with “search as you type” global search
- Built insurance forms as they are in PDFs without requiring users to learn new UI
- Reduced data duplication by building a tool to merge duplicate entries of a client
- Facilitated working on prospects by building a “comment thread” for posting comments and attaching files
- Built graphical visualizations of MySQL data with data filtering that significantly increased data visibility

Front-end Engineer, Fintech Market

June 2020 – November 2022

- Migrated entire application from Vue 2 to Vue 3
- Resolved 80% of front-end related tickets that have accumulated over 4 years in 6 months
- Increased client happiness with a documentation search that searches across all Markdown files
- Mentored junior front-end developers
- Updated 5 year old libraries to their latest versions

Full-stack Engineer, Zyrgon Network Group

April 2019 – May 2020

- Built a reusable front-end calendar library with vanilla JS
- Built a WordPress plugin that serves an app for multi-step hotel booking
- Integrated PayPal, cryptocurrency and ATM payment options

Certifications

AWS Certified Solutions Architect – Associate
